

Telepsychiatry for CHCs and FQHCs

Care for the whole patient under one roof

No limits to holistic care. No unnecessary pressure on your PCPs. Just real, good psychiatry.

Set the bar for holistic care by healing both the body AND mind.

Partnering with Iris means you are guaranteed a consistent provider who is dedicated to your clinic on a regular and consistent schedule each week. Your psychiatrist will provide direct patient care as well as consultation, so your PCPs never have to worry about treating complex mental illness on their own.

With happy clients and happy staff, you'll be a leader among CHCs in changing lives through holistic care!

Build a Sustainable Telepsychiatry Program That Your Peers Will Want to Emulate

PHYSICIAN-OWNED AND OPERATED

We are the only physician-owned and operated telepsychiatry company of this size and scope. We are not driven by big business; our passion is providing quality patient care.

CHRONIC CARE AND SUBSTANCE ABUSE MANAGEMENT

PCPs do their best to treat chronic mental health and substance abuse issues. When a specialist is part of the care plan, PCPs have more time to focus on physical health needs.

SIMPLE PRICING

We know you have budgetary responsibilities; our pricing is simple and designed to support a long-term sustainable partnership.

JOINT COMMISSION ACCREDITED

As the recognized global leader in healthcare accreditation, we are committed to providing our clinics with only highest quality behavioral health services.

CENTERED ON CLINICAL & BUSINESS HARMONY

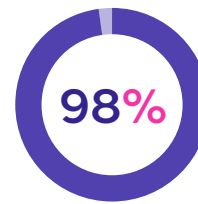

We have found that when we give patients the right care at the right time, the economic benefits closely follow.

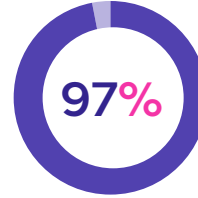

READY TO GO

We have the clinicians. Say goodbye to months of waiting to meet your provider - they are already eager to meet you!

How It Works

- 1 Kick-Off**
We'll help identify what your clinic's telepsych needs are.
- 2 Choose Your Provider**
Based off kick-off, we'll present best-fit candidates from our top 3% of vetted providers.
- 3 Credentialing**
Once you choose a provider, we'll help your team get them credentialed.
- 4 Technology Set-Up**
We ensure you have the video conference software you need and that your provider is set-up to document in your EMR.
- 5 Go-Live**
On day 1 of services, we ensure connections are smooth for patients & staff.

“Iris Telehealth made our start-up straightforward and trouble free. They provided quality psychiatrists who were a fit for our FQHC environment. As an administrator of this program, Iris Telehealth staff were responsive to our needs and always willing to problem solve when it came to credentialing, productivity and provider management.”
